

The point is...

Simply put; our goal is to reach a large number of local businesses so that we may offer some great discounts to local consumers who use our cards. Traditional advertising requires YOU, the business owner, to pay this high cost with no assurance of any return!

Taking A Local Approach...

www.GrapevineDiscounts.com uses the value of your discount offering, coupled with other local businesses, to have the local consumer pay a small fee to cover your advertising and marketing costs.

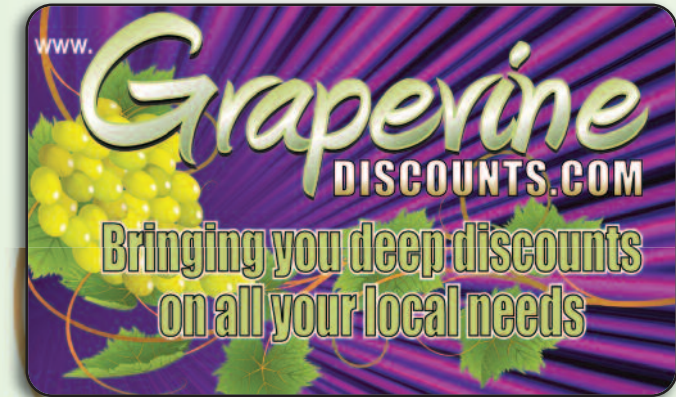

Why Shop Local?

A simple internet search will show you thousands of pages citing the benefits of shopping locally... but you and I already understand this. Together, we can show the local consumer the value of shopping and buying locally.

Offering the consumer a discount has long been the standard of encouraging them to spend dollars with local merchants.

Free Performance-based Advertising

Visit www.GrapevineDiscounts.com to find your local representative or scan the QR code with your smartphone:

Grapevine DISCOUNTS.COM

What's the cost?

Our business model is designed to take away the high cost of traditional advertising. As a local business, your free web listing will include your business name, address, phone number and the discount you offer (minimum 15%). A Google map showing the location of your business is also included, all at no cost to you.

Why continue to pay high advertising and marketing costs? GrapevineDiscounts.com enlists local non-profits, schools and other organizations to promote your local business to local consumers. Truth is... the only cost involved is when a paying customer walks in your door and makes a purchase from you!* Contact your local representative for complete details.

- Free traffic to your door
- Free business listing
- Free logo upload
- Free signage
- Free map of your location
- Free telephone number upload
- Free repeat business
